Featured Works:

Aura Media

Developed a full-featured social media platform using the MERN stack with responsive UI design and seamless user experience.

- Implemented secure user authentication system with JWT tokens and password encryption for enhanced security.
- Designed and built RESTful API architecture for core social features including posts, likes, comments, and follow functionality.
- Created an intuitive notification system alerting users when others interact with their content or follow their profile.

Aura Chat

Developed a cross-platform mobile messaging application with React Native and Firebase.

- Integrated real-time database functionality, enabling instant message delivery and synchronization across devices
- Developed custom UI components and interactive message threads enhancing user engagement.
- Implemented secure authentication flows with Firebase Authentication, prioritizing user privacy and data security.
